

Concept::ConceptExtractor::get

Concept::TestConceptExtractor
::operator()

Concept::ConceptExtractor
::normalize

```
graph LR; A[Concept::ConceptExtractor::get] --> C[Concept::ConceptExtractor::normalize]; B[Concept::TestConceptExtractor::operator()] --> C;
```

The diagram illustrates a dependency or call relationship. Two source functions, 'Concept::ConceptExtractor::get' and 'Concept::TestConceptExtractor::operator()', are shown on the left. Arrows from both point to a target function, 'Concept::ConceptExtractor::normalize', which is highlighted in a gray box on the right.
