

```
Concept::HashTable  
< Concept::Vector< char  
>, std::pair< Concept  
::String<>, Concept::Vector  
< size_t, 1 > > >::find
```

```
Concept::TestHashTable  
::operator()
```

```
Concept::HashTable::end
```

The diagram consists of three rectangular boxes. On the left, there are two white boxes with black borders. The top box contains a C++ code snippet for the `find` method of `Concept::HashTable`. The bottom box contains a C++ code snippet for the `operator()` method of `Concept::TestHashTable`. On the right, there is a gray box with a black border containing the C++ code snippet for the `end` method of `Concept::HashTable`. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both methods are being called or compared against the `end` method.
